CONTROLS

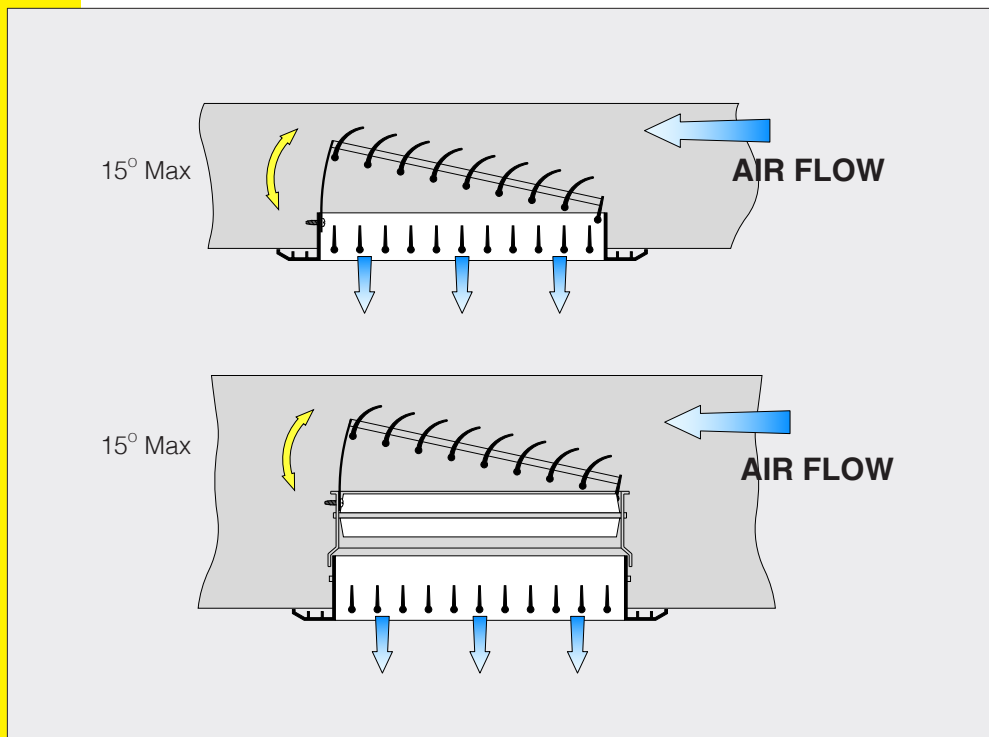

type TV / F

DUCT MOUNTED TURNING VANES

Adjustable turning vanes mounted within a subframe, designed to assist in equalising airflow across a stub branch, thereby improving distribution at the grille face. Available in maximum section sizes of 600mm x 450mm.

type TV

GRILLE & DAMPER MOUNTED TURNING VANES

As TV/F type, but vanes are fitted directly to rear of grille or grille and damper assembly. Suitable for installations in which the grille is to be mounted directly in a main duct.
