

Paint and metal finishes

FINISHES

PC

POWDER COATING

An oven baked finish which provides a film thickness of up to 80 microns, making it particularly suitable for external applications. Available in a wide range of BS or RAL colours, with gloss factors to suit requirements.

SE

STOVE ENAMELLED PAINT

A general purpose oven baked finish which provides a durable surface suitable for both internal and external applications. Available in a wide range of colours, to BS or RAL specifications, with gloss factors to suit requirements. Colours can also be formulated against samples to match non standard shades.

SEE

EPOXY STOVE ENAMELLED PAINT

Similar to the stove enamelled finish, but more suited to aggressive atmospheres such as chemical purging systems in clean rooms.

SAE

ACRYLIC STOVE ENAMELLED PAINT

A particularly durable finish specifically intended for external usage where long term colour stability is required.

SAA

SATIN ANODISED ALUMINIUM

Available as the standard finish on most products within the Brooke Air range. Surface penetration is to a depth of 5 microns and is suitable for all internal uses.

CA

COLOURED ANODISING

In addition to the standard aluminium finish, anodising can also be offered in Brass, Gold or Bronze finishes, as well as Satin Black or Blue. Depending on the type, this option may be subject to a minimum order quantity.

SSB

BRUSH FINISH STAINLESS STEEL

(Dull buff)

SSM

MIRROR FINISH STAINLESS STEEL

(bright buff)

BRASS

POLISHED BRASS

BMA

BRONZE METALIC ANTIQUE

(only available on brass products)
